EDUCATION

De La Salle University Expected 2027
B.S. in Computer Science, Software Technology | Minor in Data Science | Manila, Philippines | GPA: 3.256/4.000

- Relevant Coursework: Full-Stack Web Development; Computer Systems Architecture; Secure Software Development; UI/UX Design; Human-Computer Interaction
- Focus: Software technology and human-centered (empathic) computing applied to full-stack systems
- Certification (In Progress): AWS Cloud Practitioner

Ateneo de Manila University Senior High School (2023); Manila Science High School (2021)

TECHNICAL PROJECTS

IEEE 754 Decimal32 Simulator (CSARCH2 Machine Project) 2026
Astro, JavaScript/TypeScript, CSS | Foundation, UI architecture, and deployment

- Built an interactive IEEE 754 decimal32 simulator with DPD encoding, conversion to binary/hex, four rounding modes, and guided arithmetic
- Owned Astro app foundation, shared UI/CSS, and GitHub Pages deployment for a multi-contributor architecture course project

Bus Arbitration Virtual Exhibit (CSARCH2) 2026
Educational web exhibit | Co-author

- Co-authored a virtual exhibit explaining bus arbitration: how systems grant bus access when CPU, DMA, memory, and peripherals contend simultaneously

DLSU Profs2Pick - Secure Professor/Course Review Platform (SecDev) 2025
Node.js, Express, Handlebars, Supabase, Google OAuth, Playwright

- Built a role-based review platform (student/manager/professor) with institutional Google OAuth and secure authN/authZ patterns
- Shipped a static GitHub Pages demo with Playwright end-to-end coverage of core role workflows

LabKita! - Laboratory Reservation System (AppDev) 2024
Node.js, Express, MongoDB, Handlebars, Bootstrap | Frontend

- Developed frontend for a full-stack lab booking app covering reservations, profiles, and admin workflows in a four-person team

EXPERIENCE

Division Manager, Production and Logistics - De La Salle University Chorale Sep 2025 - Aug 2026
Premier, internationally awarded university choral ensemble

- Led logistics, conceptualization, and technical setup for major productions; served as Project Head for the Echoes of a Decade anniversary show
- Directed a production team and improved scheduling/communication through digital tracking systems

Web Application Developer - Simpleng Kristyanong Komunidad (NGO) 2025

- Designed and developed a web platform for donor communication, scholar promotion, and donation/scholarship tracking
- Applied human-centered design to strengthen the NGO's digital visibility and operational workflows

SKILLS AND INTERESTS

Languages: Python, C++, Java, Kotlin, Go, JavaScript, TypeScript, SQL

Web and Systems: Node.js, Express, MongoDB, Supabase, Astro, Handlebars, Bootstrap, HTML/CSS, Git, GitHub Actions

Practices: Full-stack development, secure software design, computer architecture simulation, UI/UX, Playwright testing

Interests: Cloud computing, academic and creative writing, arts production
